201204(V1.0)

Brief introduction of Goodrive200

Based on DSP control system, Goodrive200 inverters apply optimized V/f control and various protections to control asynchronous motor. The air duct, hardware and software have been greatly improved for better environment adaptability, operation and reliable quality certificated by TÜV SÜD.

Advantages

Product Profile	01
Advantages	01
• High performance	03
• Multi-function with simple operation	04
• Reliable quality certificated by TÜV SÜD	08
Applications	10
Technical Specifications	11
Wirings	13
Power Ratings	14
Dimensions	15
Optional Parts	21
Sales&Service Network	25

High Performance

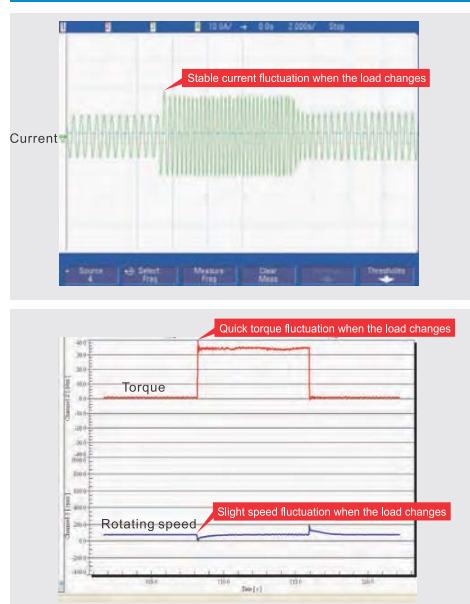

1. More Accurate Motor Autotuning

Accurate rotating and static motor autotuning
Convenient debugging and easy operation

Rotating Autotuning	Static Autotuning
De-couple from the load Applied to the situation with high control accuracy	No need to de-couple from the load Applied when rotating autotuning is not available

2. Optimized V/F Control

The current, torque and speed waveforms when sudden loading or unloading in AM V/F control mode with 2Hz running frequency and full load.

3. Perfect voltage and current control, reducing the fault protection times

OC Fault

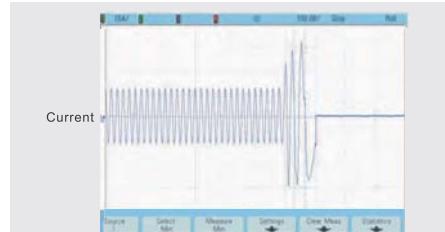

Adjust the output frequency to avoid over-current of the inverter during acceleration

OV Fault

Adjust the output frequency to avoid over-voltage of the DC bus during deceleration

4. Multiple braking modes and instant stopping

Dynamic Braking	DC Braking	Flux Braking
Configure braking units and resistors	No need to configure braking units and resistors	No need to configure braking units and resistors
Available on the situation of big inertia load and frequent braking	Available on the situation when start the running motor after braking and the situation when keep the moment output after braking to zero speed	Available on the instant stopping situation with big inertia load and no frequent braking
Big braking torque and quick braking	Not available on the situation of big inertia load or instant stopping braking in high speed running	Not available on the situation of big inertia load and frequent braking (the energy consumed on the stator and its cooling is better than DC braking)

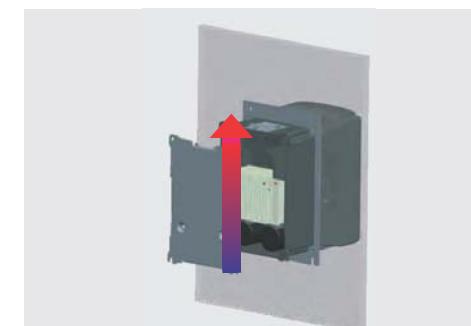

Flux braking current waveform when the running frequency is 50Hz, deceleration time is 0.1s with full load in asynchronous motor V/f control mode.

Multi-function with simple operation

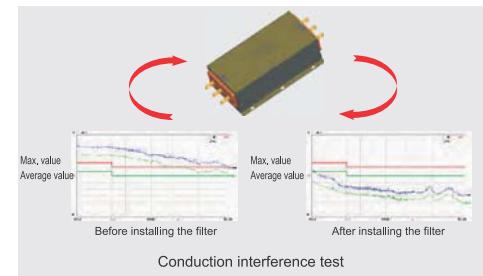

1. Separate Air-duct

The separate air duct prevents the contaminants into the electronic parts/components and greatly improves the protective effect of the inverter, as well as its reliability and service life, to adapt various complicated site environments. It can also facilitate the heat-releasing in control cabinets and the heat-releasing design of the customer.

3. C3 input filter(standard configuration) and C2 filter (optional)

C3 input filter is embedded in the factory to meet different application requirements, save installation space and avoid electromagnetic interference caused by incorrect selection and site installation.

Conduction interference test

Remarks:

C2 filter: EMC performance of the inverter achieves the limited usage requirement in civil environment.

C3 filter: EMC performance of the inverter achieves the limited usage requirement in industrial environment.

4. Book Structure

Parallel installation

Smaller installation space with less cost and beautiful appearance.

5. The rivet design ensures reliable integration connection

Greener Proper grounding
Stronger corrosion-resistance Excellent EMC performance

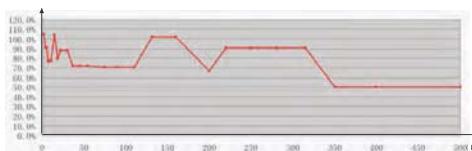

Terminals	Quantity	Features
ON-OFF input	8 channels	1KHz NPN and PNP
High speed pulse input	1 channel	50KHz NPN and PNP
Analog input	3 channels	AI1, AI2 0~10V/0~220mA AI3 -10~10V
ON-OFF output	1 channel	Max. output frequency:1KHz
High speed pulse output	1 channel	Max. output frequency:50KHz
Analog output	2 channels	0~10V, 0~20mA
Relay output	2 channels	3A/250V AC, 1A/30V DC, NO+NC

6. Smaller Size

Due to the thermal simulation and advanced modularized design, the size of our product is reduced greatly. The width ratio between Goodrive200 and CHF100A is shown in the figure below (the Max. percentage is 50%)

Goodrive200/CHF100A

8. High Performance Keypad

7. Various external interfaces and swappable terminal board convenient for replacement and maintenance

The standard LED keypad supports parameters loading and unloading with Max. length of 200m and digital potentiometer. The optional external LCD keypad supports parameters loading and unloading with displaying 10 lines and 10 rows of Chinese characters and several languages.
Remarks: LCD keypad is in research. It is estimated to accept orders after May, 2012.

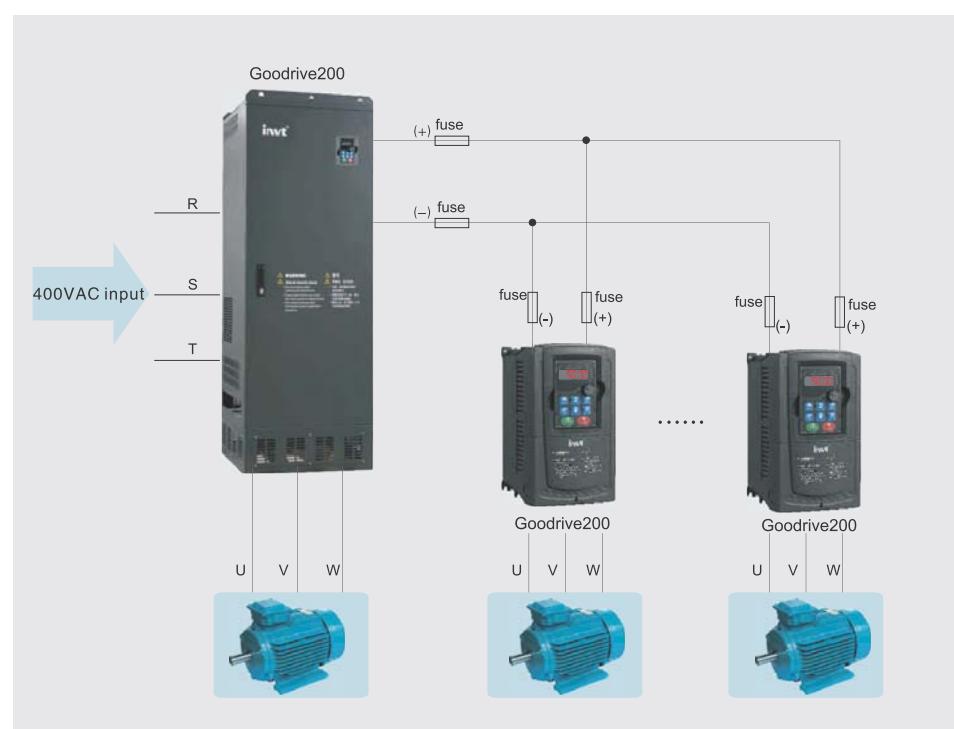

9. Embedded braking units of 1.5~30kW inverters

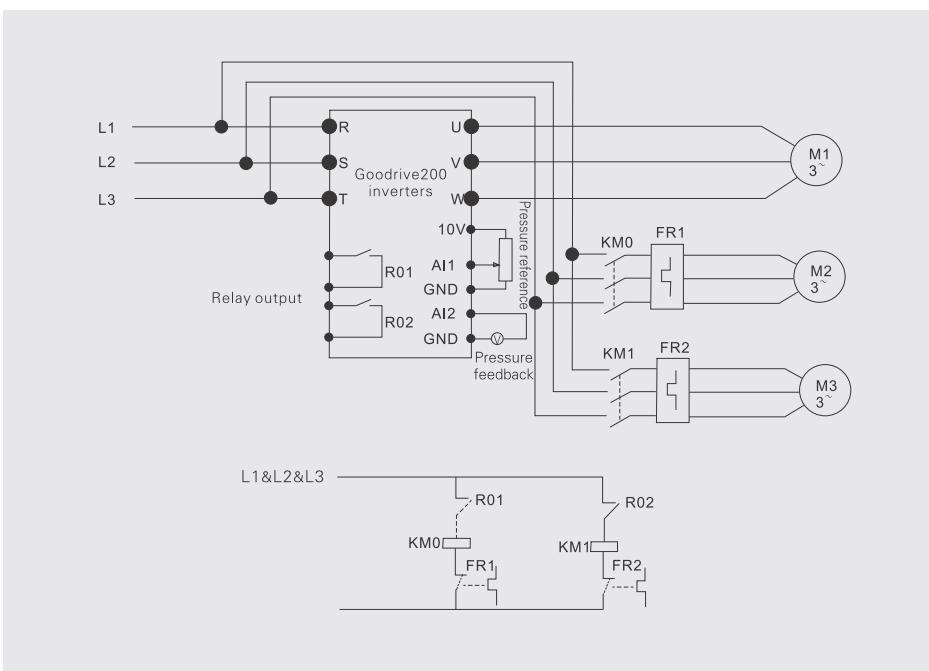

Reduce the occupied space and decrease the cost

10. Supporting common DC bus

Reduce the power lost on DBR
Note the impact current and the capacity of the input AC system

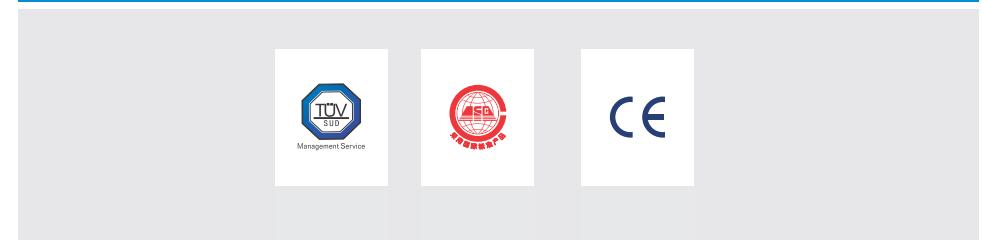

11、Available on DC power supply**12、Simple water supply mode**

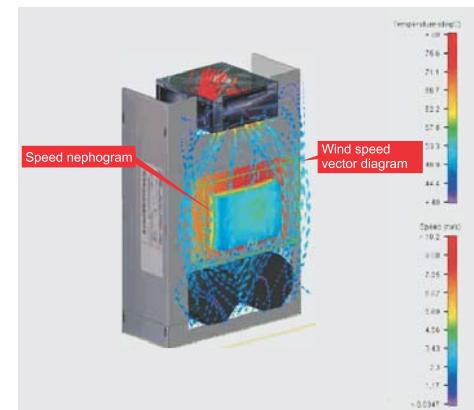

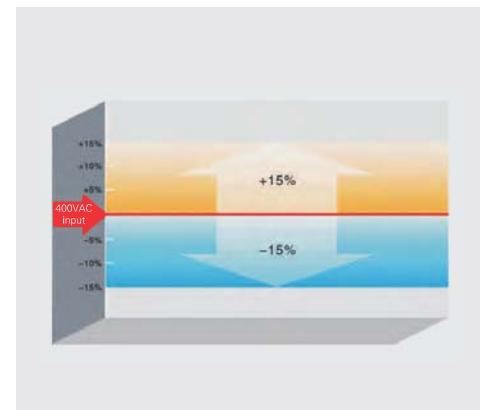

In the diagram above, M2 and M3 are auxiliary motors which are controlled by R01 and R02. PID constant-pressure automatic control system is formed by the inverter through pressure feedback. The pressure reference can apply analog or keypad input. Modbus 485 communication protocol is also supported.

Reliable quality certificated by TÜV SÜD

1、The product design follows IEC national standards and passes the CE test of international authority TÜV SÜD, INVT is the unique manufacturer having TÜV-MARK marks in Chinese industrial control field.

Remarks: Each Gooddrive200 inverter has past the test certification

2、Advanced thermal technology makes exact thermal design**3、Wide voltage range meets the requirement of grid environment**

4. Perfect and reliable test system ensure products adapt complicated site environments and INVT is the only manufacturer achieved ACT certificate of TÜV SÜD

Experiment Type	Experiment Name	Classification
Mechanical Reliability Experiments	Package Experiments	Package compression experiments
		Package resonance imaging and storage test
		Package random vibration test
		Package dropping test
		Package rolling test
		Package dumping test
		Package inclined impact test
	Impact Test	Half-sine wave impulse test(non-working state)
		Trapezoidal wave impulse test (non-working state)
	VibrationTest	Sinusoidal vibration test (working state)
		Random vibration test (working and non-working state)
Climatic Environmental Reliability Test	Temperature Experiment	Low temperature storage test
		High temperature storage test
		Low temperature experiments
		High temperature experiments
		Temperature gradient experiments
		Temperature impact test
	Thermal Test	Constant thermal test
		Alternation thermal test
	Salt Spray Test	Constant salt spray test
		Alternation salt spray test
	Low Air Pressure Test	Low Air Pressure Test
		Low temperature and low pressure test
		High temperature and low pressure test

Remarks:

The full name of ACT is Acceptance of Client's Testing, which means the German TÜV SÜD admit the technology level of the lab and accept their separate testing data and test reports officially.

Electric Vibration System

Low Pressure Test Chamber (L)
Constant Temperature and Humidity Test Chamber (R)Natural Convection Test Chamber (L)
Thermal Shock Test Chamber (R)

Applications

Warming

Mine

Water Supply

Fans and Water Pumps

Oil

Universal Drive

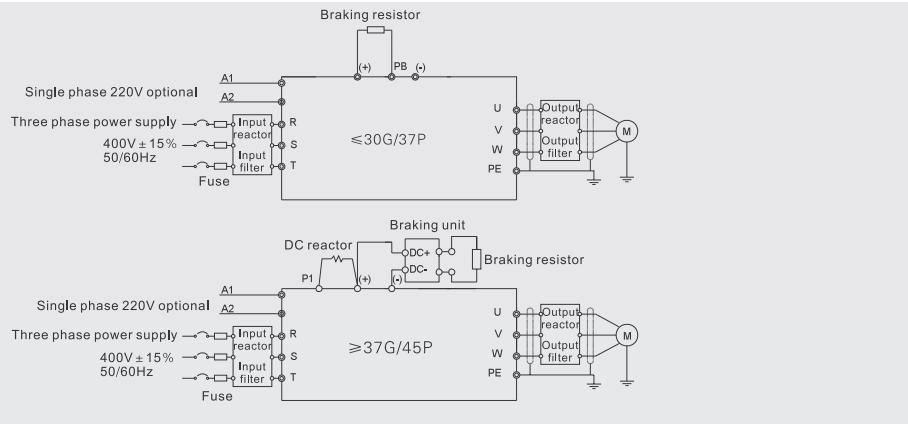

Technical Specifications

Function	Specification
Input	Input Voltage (V) AC 3PH 400V±15%
	Input Frequency (Hz) 50Hz or 60Hz Allowed range: 47~63Hz
Output	Output Voltage (V) 0~input voltage
	Output Frequency (Hz) 0~400Hz
Technical Control Feature	Control Mode V/F
	Motor Type Asynchronous motor
	Speed-adjusting Ratio Asynchronous motor 1:100
	Starting Torque Asynchronous motor: 0.5Hz/150%
	Overload Capability G type: 150% of rated current: 1 minute 180% of rated current: 10 seconds 200% of rated current: 1 second P type: 120% of rated current: 60 seconds
Running Control Feature	Frequency Setting Digital setting, analog setting, pulse frequency setting, multi-step speed running setting, simple PLC setting, PID setting, MODBUS communication setting. Realize the shifting between the set combination and set channel.
	Auto Voltage Adjustment Keep a stable voltage automatically when the grid voltage fluctuates
	Fault Protection Provide over 30 fault protection functions: overcurrent, overvoltage, undervoltage, overheating, phase failure and overload, etc.
Speed Tracking	Restart the rotating motor smoothly

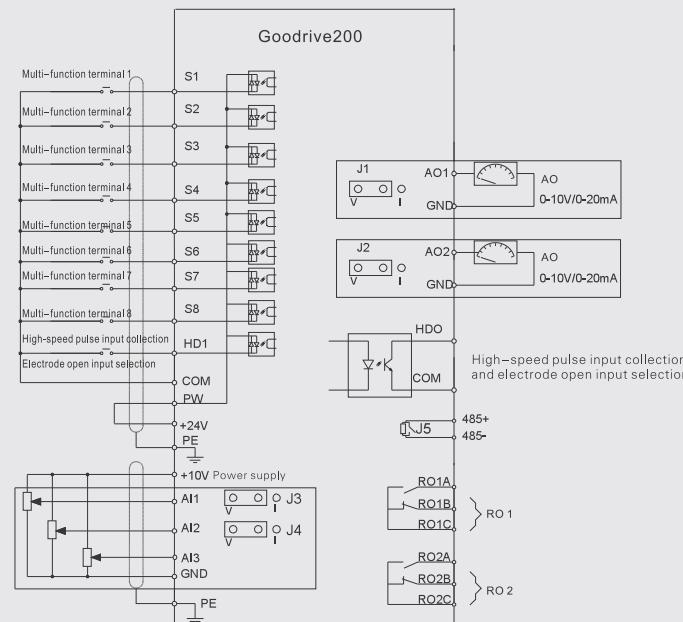

Function	Specification
Peripheral Interface	Terminal Analog Input Resolution ≤10mV
	Terminal Switch Input Resolution ≤2ms
	Analog Input 2 channels (AI1, AI2) 0~10V/0~20mA and 1 channel (AI3) -10~10V
	Analog Output 2 channels (AO1, AO2) 0~10V /0~20mA
	Digital Input 8 channels common input, the Max. frequency: 1kHz 1 channel high speed pulse input, the Max. frequency: 50kHz
	Digital Output 1 channel high speed pulse output, the Max. frequency: 50kHz; 1 channel Y terminal open collector output
	Relay Output 2 channels programmable relay output RO1A NO, RO1B NC, RO1C common terminal RO2A NO, RO2B NC, RO2C common terminal Contactor capability: 3A/AC250V,1A/DC30V
Others	Mountable Method Wall, flange and floor mountable
	Temperature of the running environment -10~50°C, derate above 40°C
	Ingress Protection IP20
	Cooling Air-cooling
	Braking Unit Built-in braking unit for below 30G/37P (including 30G/37P) External braking unit for others
	Braking Resistor Optional external configuration
	EMC Filter Built-in C3 filter: meet the degree requirement of IEC61800-3 C3 External filter:meet the degree requirement of IEC61800-3 C2

Remarks:

- The input current of the inverter 1.5G-315G/350P is tested when the input voltage is 380V and there is no DC reactor and output/input reactor.
- The current of the inverter 350G/400P-500G is tested when the input voltage is 380V and there is input reactor.
- Rated output current is defined when the rated output voltage is 380V.

Dimensions (Unit:mm, below power ratings are subject to G type machine and referred for P type machine.)

Dimensions

Optional Parts

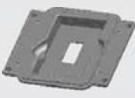

1、Flange Mounting Panel
Needed for 1.5G-30G//37P inverters. Not needed for 37G/40P-200G//220P inverters.

2、Installation Base
Only optional in 220G/250P-315G/350P inverters .Its bases can be built in an input AC (or DC) reactor or an output AC reactor

3、Installation bracket for the keypad
Installation bracket or M3 screw can be used in the installation of external keypad. The bracket of 1.5G-30G//37P inverters is optional. The bracket of 37G/40P-500G inverters is standard.

4、Heat-releasing Hole
Inverter needs to derate when selecting a cover Consult with the INVT technicians for the detailed information.

5、LCD keypad
10 rows of DH displaying Compatible with the LED keypad. Support Chinese/English languages and copy function.

6、AC single-phase 220V input auxiliary power supply
For more convenient debugging

For more convenient debugging

7、Reactor
The inverters of 37G/45P and above can be connected with external DC reactor. The reactor can improve the power factor and avoid damage to the rectifier bridge caused by overcurrent and damage to the rectifier circuit by harmonic

Remarks:

1. C2 standard can be achieved of select above external filters
2. The inverter of 110G/132P or above select filters referring to the non-standard mode, please consult with INVT technicians for detailed information.

9、Braking System

The inverters of 30G/37P and below are embedded internal braking units and the inverters of 37G/45P and above need external braking units, please select the braking units according to actual use (the requirement of braking torque and braking usage ratio)

The braking resistor will increase the braking torque, the following table is the resistor power designed to different situations and user needs to select according to actual situation.

Model NO.	DBU Model	DBR Value 100% Braking (Ω)	DBR Power 10% Braking(kW)	DBR Power 50% Braking(kW)	DBR Power 80% Braking(kW)	Minimum DBR Value (Ω)
GD200-1R5G-4	Internal Braking Unit	326	0.23	1.1	1.8	170
